Architecture, the art and technique of designing and building, as distinguished from the skills associated with construction. The practice of architecture is employed to fulfill both practical and expressive requirements, and thus it serves both utilitarian and aesthetic ends. Although these two ends may be distinguished, they cannot be separated, and the relative weight given to each can vary ...

Architecture. The Columbus Quincentennial in 1992 sparked a major refurbishing of the colonial architecture of Puerto Rico. The island's architectural heritage is Spanish, of course, as seen in the narrow, winding cobblestone streets and the pastel-colored, tile-roofed buildings with ornate balconies and heavy wooden doors that open onto inner courtyards in the style of Andalusia in southern ...
