ARM calls FIQ the fast interrupt, with the implication that IRQ is normal priority.In any real system, there will be many more sources of interrupts than just two devices and there will therefore be some external hardware interrupt controller which allows masking, prioritization etc. of these multiple sources and which drives the interrupt request lines to the processor.

arm - What is the difference between FIQ and IRQ interrupt ...

Random-access memory (RAM / r æ m /) is a form of computer data storage that stores data and machine code currently being used. A random-access memory device allows data items to be read or written in almost the same amount of time irrespective of the physical location of data inside the memory. In contrast, with other direct-access data storage media such as hard disks, CD-RWs, DVD-RWs and ...

The Right Way to Interrupt Someone at Work - Entrepreneur

The Southern Poverty Law Center gathered hundreds of stories of everyday bigotry from people across the United States. They told their stories through e-mail, personal interviews and at roundtable discussions in four cities. People spoke about encounters in stores and restaurants, on streets and in schools. No matter the location or relationship, the stories echo each other.
