Earth's Climate: Past and Future 3rd edition ...

Earth's climate has changed dramatically over its history moving between completely ice-free intervals to periods of global glaciation. This course will examine how and why these changes occurred by identifying the major components of the Earth's climate system and exploring the factors and processes that influence the system over a variety of timescales.

Earth's Climate: Past, Present and Future - Courses

Throughout Earth's history, global and regional climate has changed on very long time scales, and many of the past conditions can be discovered by studying natural records. How Do We Study Past Climates? Paleoclimatology is the study of climate records from hundreds to millions of years ago.
