Integrated Pest Management - UGA Extension

Abstract Push-pull strategies involve the behavioral manipulation of insect pests and their natural enemies via the integration of stimuli that act to make the protected resource unattractive or unsuitable to the pests (push) while luring them toward an attractive source (pull) from where the pests are subsequently removed. The push and pull components are generally nontoxic.

The Use of Push-Pull Strategies in Integrated Pest ...

What is Integrated Pest Management? The city's approach to Integrated Pest Management or IPM is true to the original concept, that was developed by a group of professors at the University of California in the late 1950's in response to the "fast-moving pesticide treadmill" associated with the overuse of pesticides, particularly DDT after World War II.
