Problems and exercises in Operations Research Leo Liberti1 Last update: November 29, 2006
1Some exercises have been proposed by other authors, as detailed in the text. All the solutions, however, are by the author, who takes full responsibility for their accuracy (or lack thereof).

These problems pages provide a series of problems for instruction in operations research. Problems are arranged by general categories such as Linear Programming, Network Flow Programming, etc. As the authors generate problems or receive problems from other contributors, they will be added to these pages.

Problems - Operations Research Models and Methods

This book elucidates the key concepts and methods of operations research. It supplements textbooks on operations research and upgrades students knowledge and skills in the subject. This book has been written particularly for those whose primary interest is the application of operations research techniques, hence mathematical derivations have been omitted.

The British/Europeans refer to "operational research", the Americans to "operations research" - but both are often shortened to just "OR" (which is the term we will use). Another term which is used for this field is "management science" ("MS"). The Americans sometimes combine the terms OR and MS together and say "OR/MS" or "ORMS".

Programming Maximization Problems J. Reeb and S. Leavengood EM 8720-E October 1998 \$3.00 A key problem faced by managers is how to allocate scarce resources among activities or projects. Linear programming, or LP, is a method of allocating resources in an optimal way. It is one of the most widely used operations research (OR) tools.

Operations research, or operational research (OR) in British usage, is a discipline that deals with the application of advanced analytical methods to help make better decisions. Further, the term operational analysis is used in the British (and some British Commonwealth) military as an intrinsic part of capability development, management and assurance.

What excites me about my research is combining ideas from different subject areas, like math, computer science, statistics, and operations research, to develop novel modeling approaches and solutions for large-scale problems. Jeff Alden: I basically pursued areas that I liked, excelled in, and seemed good for a future career. Since I really ...

Operations research - The system design problem: Operations research has traditionally been concerned with finding effective solutions to specific operational problems. It has developed better methods, techniques, and tools for doing so. But operations researchers have found that too many of their solutions are not implemented and, of those that are, too few survive the inclination of ...

Operations research - Deriving solutions from models: Procedures for deriving solutions from models are either deductive or inductive. With deduction one moves directly from the model to a solution in either symbolic or numerical form. Such procedures are supplied by mathematics; for example, the calculus. An explicit analytical procedure for finding the solution is called an algorithm.
