

*Science For The Empire Scientific Nationalism In Modern Japan*

### **Science For The Empire Scientific**

This fascinating study examines the discourse of science in Japan from the 1920s to the 1940s in relation to nationalism and imperialism. How did Japan, with Shinto creation mythology at the absolute core of its national identity, come to promote the advancement of science and technology? Using what logic did wartime Japanese embrace both the rationality that denied and the nationalism that ...

Focusing on three groups of science promoters—technocrats, Marxists, and popular science proponents—this work demonstrates how each group made sense of apparent contradictions by articulating its politics through different definitions of science and visions of a scientific Japan.

### **Science for the Empire: Scientific Nationalism in Modern ...**

The third major section of Science for the Empire describes and analyzes the “sense of wonder” about learning science exemplified in popular science magazines such as Science Illustrated and Children's Science, the latter including very popular radio-making diagrams and model-making contests. Most Japanese interested in science read these popular magazines and were not obsessed with the philosophical, theoretical writings of Marxist or technocrat scientists.

These are the questions at the heart of Science for the Empire, which is a well-crafted history of the discourse of science from the 1920s to the 1940s. Author Hiromi Mizuno provides us with a serious examination of how science became bound up with the nation and introduces the novel concept of "scientific nationalism."

Science and technology in the Ottoman Empire had spanned many years. During its 600-year reign, the Ottoman Empire made significant advances in science and technology, in a wide range of fields including mathematics, astronomy and medicine. The Islamic Golden Age was traditionally believed to have ended in the 14th century, but has been extended to the 15th and 16th centuries by recent scholarship, which has demonstrated that scientific activity continued in the Ottoman Empire in the west and in

Roman Science The Romans assimilated earlier Greek science for their own purposes, evaluating and then accepting or rejecting that which was most useful, much as they did in other fields such as warfare, art, and theatre. This assimilation of Greek thought began in the 2nd century BCE, and ideas often came with their practitioners.

Mizuno begins Science for the Empire: Scientific Nationalism in Modern Japan where Bartholomew left off, with World War I, when the value of industrial production first exceeded that of agricultural production and science and technology thus became integral to Japanese life. To counter the Anglo-French blockade of Germany that severed Japan's access to its customary supply of chemicals, pharmaceuticals, and precision instruments, the government inaugurated investment in research and development.
