where ΔG is the Gibb's free energy, R is the universal gas constant, T is temperature, K_a is the acid dissociation constant, S_{MS} is the salt solubility, and S_{FB} is free base solubility.. For a salt of a weakly basic drug, disproportionation may be induced by an excipient that raises the microenvironmental pH of the sorbed water layer above the pH_{max} value.

Salt disproportionation: A material science perspective ...

2.1.. Applicability, fitness for purpose and acceptability limitsThe method applicability is a set of features that cover, apart from the performance specifications, information about the identity of analyte (e.g., nature and speciation), concentration range covered, kind of matrix of the material considered for validation, the corresponding protocol (describing equipment, reagents, analytical ...

A practical guide to analytical method validation ...

Assessment Reports. Accelerated BIOL Pre-NURS Pre-Requisites Assessment 2018; Assessment Conference Presentation, TMCC, 2012; Assessment Conference Presentation, UNR, 2010
