A loudspeaker (or loud-speaker or speaker) is an electroacoustic transducer; a device which converts an electrical audio signal into a corresponding sound. The most widely used type of speaker in the 2010s is the dynamic speaker, invented in 1925 by Edward W. Kellogg and Chester W. Rice. The dynamic speaker operates on the same basic principle as a dynamic microphone, but in reverse, to produce ...

The second deviation would be a more modern driver board for the Mk III. There are currently several on the market, one called the Poseiden from DIYTube, one from Tubes4HiFi that incorporates additional electrolytics on the board its-self, one from Curcio Audio and one from Triode Electronics. All four boards make use of two driver tubes as opposed to the stock version's single tube.
